SUMMARY

Front-end web developer passionate about the user experience and what drives user interaction. Experienced in working with and managing teams. Motivated by ongoing learning and personal growth. Excited to employ my skills as a web developer while continuing to adapt to new technologies, developments, and user preferences.

TECHNICAL SKILLS

Languages
HTML, CSS, JavaScript

Tools
Bootstrap, JQuery, Node, APIs

EDUCATION

Full Stack Web Development Certification 2021 University of Washington
Completed intensive 24-week program focused on building dynamic web programs.

Bachelor's Degree – Business Administration 2017 University of Washington
Concentrations in Marketing and Retail Management. Graduated Magna Cum Laude.

EXPERIENCE

Central Washington University – Office Assistant Lead

September 2019 – Present

As an Office Assistant Lead, I adapted daily to the challenges and tasks at hand. I worked consistently with the Microsoft Office Suite, and participated in trainings to hone these skills. As a lead, I oversaw and trained student employees. I assisted in the development of a number of university webpages in Central's new 2019 web theme. During the COVID-19 pandemic I quickly adapted to working remotely and was able to shift my priorities to assist in processing the disbursement of CARES emergency funding. I was recognized twice for service excellence in this role through the Wildcat Way spotlight.

Hertz – Management Associate II

February 2018 – August 2019

In this role I provided excellent customer service while also ensuring our fleet of vehicles was well maintained. I worked hard to ensure all Hertz policies and procedures were being followed by myself and junior agents to mitigate fraudulent transactions and protect customer information. I was responsible for compiling weekly reports on Excel spreadsheets and uploading them to Microsoft Teams.

PROJECTS

Bored!

Summary: Created an application which pulled event, attraction, and weather data from a user's location to recommend activities.

Roles: Front end development, Triposo API functionality

Tools: HTML, CSS, JavaScript, JQuery, Semantic UI, several APIs

Repository:
https://github.com/dancornutt/UWB-ActivityApp

Application:
https://dancornutt.github.io/UWB-ActivityApp/

Weather Dashboard

Summary: Created a weather dashboard that responds to user searches and stores the last searched city in local storage.

Roles: Sole author

Tools: HTML, CSS, JavaScript, JQuery, Bootstrap, Moment.js, Open Weather Map API

Repository :
https://github.com/aubrey-heim/weather-dashboard

Application:
https://aubrey-heim.github.io/weather-dashboard/

Code Quiz

Summary: Using one HTML document, created a coding quiz which acted as three separate pages (directions, the quiz, and high scores). Stored user high scores to local storage.

Roles: Sole author

Tools: HTML, CSS, JavaScript, Bootstrap

Repository:
https://github.com/aubrey-heim/code-quiz

Application:
https://aubrey-heim.github.io/code-quiz/
